Dear TGA,

I would like to voice my opposition to the proposed changing of Budesonide/Formoterol to schedule 3. The current licensing ensures that patients with asthma must have regular, at least 6 monthly reviews, with their doctor. These reviews are vital to ensure their asthma control is adequate, check inhaler technique, ensure their asthma action plan is up to date and they know how to manage an asthma attack, and consider if they are on the correct preventer. By making bud/form schedule 3, it will bypass all this education and review, which we know is so crucial in good asthma management.

Kind Regards,
